

Curriculum Vitae

Education / Employment

2002 - 2007

Central Lancaster High School

8.5 GCSEs (A* - C)
GNVQ ICT

2007 - 2008

Lancaster & Morecambe College

BTEC Public Services Level 2

2005 - 2008

M&M Computers

Part time work at a small computer store, building and repairing both computers and home networks.

2009 - 2010

WebsiteUK Ltd

Web Designer for a local company. I completed a large number of websites for small UK businesses in the time I worked there, and had lots of opportunity to develop my skill set and workflow.

2008 - Present

Freelancer / Cenix Web Design

I have also been creating web sites as a freelancer, mainly working with small to mid-sized local businesses. As of 2010 I am currently working to start up a web design agency called Cenix Web Design with another local web designer.

Examples

WallingUK Ltd

<http://www.wallinguk.co.uk/>

This used farm machinery website was a collaboration between myself and a friend. The client was very pleased with the style of the front end of the site, the custom system we built for listing stock, the dramatic rise in traffic and the much lower bounce rate he experienced after launch.

Usher Engineering Services Ltd

<http://www.electricalengineers4u.co.uk/>

I designed and built this site whilst working for WebsiteUK. The client was particularly pleased with the clean presentation and ease of use.

Lancaster Air Cadets

<http://www.lancasteraircadets.co.uk/>

This is another site I've collaborated on, this time for a local Air Cadet squadron I'm a member of. The challenge with this website was getting lots of dynamic features like a calendar, blog, gallery and more to work together, whilst also sharing a similar admin interface. We achieved this by using Wordpress and a lot of heavy modification.

Personal Portfolio

<http://danielmorgan.co.uk/>

I often remake this website to try out new technologies and to show off some of my latest work. This is often updated with my latest work.
